PROFESSIONAL SUMMARY

Aspiring Cloud, AI & ML Engineer currently pursuing a B.Sc (Hons) in Computer Science. Passionate about building scalable cloud architectures, implementing machine learning models, and exploring the boundaries of AI and 3D web technologies. Seeking an opportunity to leverage my technical skills to contribute to innovative projects while growing professionally.

EDUCATION

B.Sc (Hons) Computer Science

2024 - 2027

JSPM University

- Current GPA: 8.8
- Focus: Artificial Intelligence, Cloud Technology, and Software Engineering.

12th Grade (Science)

76.5%

Vidya Public School

10th Grade

78.5%

Sunbeam World School

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++

Cloud & AI: AWS, Google Cloud Platform (GCP), Machine Learning, Artificial Intelligence, Cloud Computing, IoT

Core Computer Science: Data Structures using C, DBMS, RDBMS, Compiler Design, Software Engineering, UML, Data Communication Network, Ethical Hacking

Tools & Technologies: Git, GitHub, Docker, Advanced Excel

CERTIFICATIONS

NPTEL Certification in Cloud Computing

IIT Kharagpur

- Comprehensive certification covering cloud architecture, virtualization, and cloud service models.

NPTEL Certification in Ethical Hacking

IIT Kharagpur

- Certification focusing on cybersecurity, penetration testing, and vulnerability assessment methodologies.

INTERNSHIP EXPERIENCE

Self-Employed

- Completed a 24-week intensive internship in cloud technology across different platforms.
- Designed and developed responsive cloud services and solutions.
- Implemented modern IoT and AI/ML principles to improve projects and models.
- Worked extensively on AWS and Google Cloud Platform (GCP).

PROJECTS

Interactive 3D Portfolio

HTML, CSS, AI, GitHub Pages

- Built a fully responsive, custom portfolio website from scratch.
- Integrated an interactive 360-degree 3D avatar viewer and a neural network skill map.
- Live Demo: g1pro108.github.io/HTML-PORTFOLIO/

Flash Flood Prediction System

Python, ML, IoT

- Developed a predictive system for hilly regions using multi-source data.
- Integrated rainfall data, soil moisture sensors, and historical landslide inventories to generate hyper-local forecasts.
- View on GitHub: github.com/G1pro108

LANGUAGES

Hindi, English, German, Russian
